

## **OUR TEAM**

Amadeo Cabanela

Ronel Solomon

Krit Poshakrishna

David Ramirez

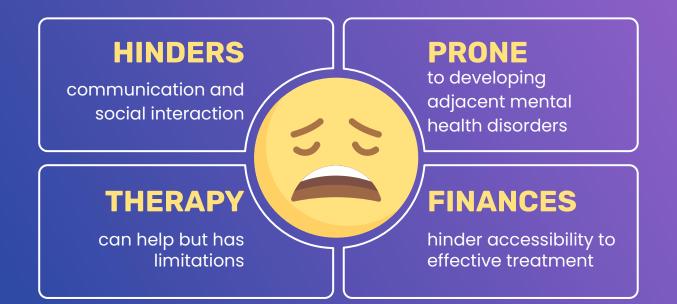

Yi-Fang Tsai

#### **PROBLEM**

People with Neurodevelopmental Disorders (NDDs)

Difficulty with emotion regulation and understanding social cues

#### WHAT ARE NDDs?

#### Neurodevelopmental Disorders (NDDs)

- Affect brain development from childhood (sometimes adulthood)
- Leads to difficulties in social, cognitive, and emotional functioning

#### Types of NDDs [2]

Autism Spectrum Disorder (ASD)

Attention-Deficit/Hyperactivity Disorder (ADHD)

**Learning Disability** 

Intellectual Disorder

Epilepsy

#### **IMPACT**

From 2019 to 2021, developmental disability diagnoses in US children aged 3–17 years increased from 7.40% to 8.56%. [cnc]

In 2017, an estimated 5.4 million (2.21%) of adults over 18 in the US have ASD. [cnc]

This affects the daily lives of millions of individuals with NDDs and their families, friends, and communities.

#### **CUSTOMER INTERVIEWS**

Insights from domain experts and potential customers informed our design:

Dr. Kittiphat Wedthanyaporn

Pediatric Specialist

"Many of my patients lack sufficient treatment because of financial constraints." Dr. Neha Bhasin

Neuroscientist

"Since the brain is so complex, we have a significant gap in translating research findings into resource-intensive treatments."

"Reuben"

Potential Customer (Asperger's)

"I have trouble with eye contact; I rely more on tone of voice to gauge someone's emotions." June-Wei Yu

Occupational Therapist

"I have found role-playing, using cards, and gamification to be engaging elements that are very effective." "Noah"

Potential Customer (Epilepsy)

"I like asking
ChatGPT about
social situations
because I get an
answer right away
and I don't feel
judged."

#### **DESIGN BACKED BY DOMAIN EXPERTS**

We incorporated the insights from our interviews as elements in our solution.

Dr. Kittiphat Wedthanyaporn

Pediatric Specialist

"Many of my patients lack sufficient treatment because of financial constraints."

FREE-TRIAL OFFERING

Dr. Neha Bhasin

Neuroscientist

"Since the brain is so complex, we have a significant gap in translating research findings into resource-intensive treatments."

ACCESSIBLE VIA WEB

"Reuben"

Potential Customer (Asperger's)

"I have trouble with eye contact; I rely more on tone of voice to gauge someone's emotions."

LEARNING CENTER

June-Wei Yu

Occupational Therapist

"I have found role-playing, using cards, and gamification to be engaging elements that are very effective."

SCENARIO TRAINING

"Noah"

Potential Customer (Epilepsy)

"I like asking
ChatGPT about
social situations
because I get an
answer right away
and I don't feel
judged."

REAL-TIME FEEDBACK

#### **OUR SOLUTION**

A real-time Web-App that leverages computer vision to identify emotions from facial expressions

**DYNAMIC** 

and interactive learning/therapy environment

**REAL-TIME** 

with own facial expressions identifier

CONTEXTUAL

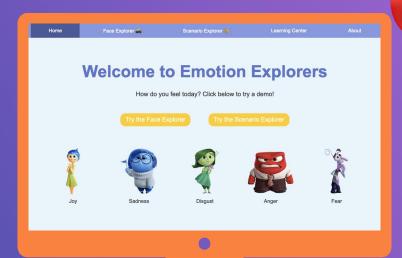

scenario-based facial expression training

#### **INTRODUCING EMOTION EXPLORERS**

#### Features:

- Realtime own facial expressions identifier with dynamic feedback.
- Scenario-Based training: practice appropriate facial expressions based on the context of a scenario.
- Learning Center: glossary of emotions and their definitions.

# INTRODUCING EMOTION EXPLORERS DEMO

#### **TECHNOLOGY**

#### **COMPUTER VISION**

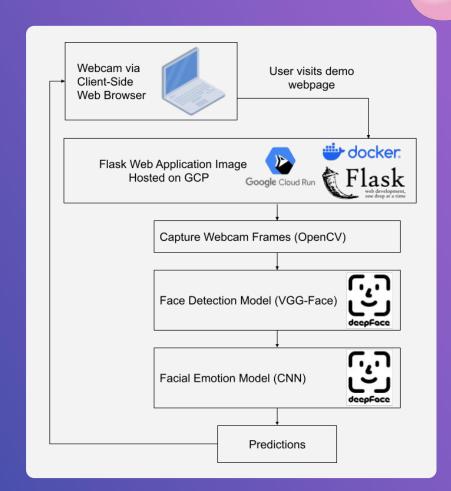

Dynamically detect facial expressions

#### **CONTAINERIZATION**

Enhanced portability and flexibility

#### **ENGAGING UI/UX**

Fun color palette and clear verbiage

### THE MARKET

NDD: 1 in 12 children [6 Million]
Autism SD: 1 in 36 children [2 million]
(Source: CDC)

PATIENTS

THERAPIST

And medical institutions

Market Goal: 500,000 users on Year 5

#### **OUR COMPETITORS**

### **ROADMAP**

#### **MULTIMODAL**

incorporate tone of voice

#### **PERSONALIZATION**

progress reports, user stats

#### **GAMIFICATION**

points system
